MT. ADAMS STREETScape

As part of the City of Cincinnati's ongoing investment in the neighborhood of Mt. Adams, the Department of Transportation and Engineering has begun streetscape work on St. Gregory Street from Hatch Street to Pavilion Street. Crews of the City's Contractor, Trend Construction, will be replacing curbs, sidewalks, driveway aprons, street lights, trees, utilities and asphalt pavement. They will also widen the sidewalk located along the west side of St. Gregory Street between Hatch Street and Monastery Street. This work should end in September 2009. The contractor will complete the work in phases, and will normally work from 7 am to 4 pm, Monday through Friday, although occasionally work may extend beyond 4 pm and may even continue over the weekend. Traffic on St. Gregory Street will be maintained for the duration of the project.

Motorists are urged to reduce speed and use caution when driving through the construction area.

The Department of Transportation and Engineering oversees the rehabilitation and improvement of the City of Cincinnati's infrastructure. The Department also provides transportation planning, design, engineering services, structural and geotechnical services, right of way regulation, and construction management. It is the clearinghouse for all City and regional transportation functions, and serves as a liaison to the Southwest Ohio Regional Transit Authority.
