## **MSD Notice of Construction Harwinton Lane Sewer Replacement In Green Township, Hamilton County, Ohio**

Cincinnati, March 20, 2009. The Board of County Commissioners has recently approved funding for the Harwinton Lane Sewer Replacement. Managed by the Metropolitan Sewer District of Greater Cincinnati (MSD), construction is scheduled to begin in April 2009 and is scheduled for completion in February 2010. The awarded construction cost for the project is \$678,060.50 and is to be completed by Trend Construction.

The project consists of the replacement of approximately 2,000 feet of severely damaged 12-inch diameter sanitary sewer with sewers ranging in size from 15-inch to 21-inch diameter to increase the existing sanitary sewer's capacity to eliminate wet weather surcharging. The project will eliminate Sanitary Sewer Overflow (SSO) 1012 which discharges 1.3 mg each year. The project will run from a manhole near House Number 5987 Lawrence Road southward, crossing Harwinton Lane in the area of House Number 3319, then southeasterly, crossing Harborside Drive to a manhole approximately 160 feet southeast of Harborside Drive. The project is located in Green Township.

This project is part of MSD's ongoing Capital Improvement Program (CIP), which is focused on continually updating and improving the operation of MSD's wastewater collection and treatment systems.

Every day, the Metropolitan Sewer District of Greater Cincinnati (MSD) manages the effective collection and treatment of more than 200 million gallons of wastewater and actively maintains 3,000 miles of sanitary and combined sewers that run through the 49 municipalities and townships of Hamilton County. Owned by Hamilton County and operated by the City of Cincinnati, MSD is committed to continually maintaining and improving its wastewater collection and treatment systems for the betterment of both public and environmental health.
