TRAFFIC ALERT

Westbound Waldvogel Viaduct

Work to replace a crash attenuator on the westbound approach to the Waldvogel Viaduct will take place this weekend. This replacement will require closing the viaduct. Motorists travelling westbound on the Sixth Street Expressway will not be able to exit onto the Waldvogel Viaduct and access Warsaw Avenue or Elberon Avenue. To minimize the impact to traffic this work is being scheduled to take place at night. The viaduct will close on Sunday, June 7, 2009 at 8PM and be reopened by Monday, June 8, 2009 at 6AM. In case of inclement weather, this closure will be rescheduled for a later date.

Drivers are encouraged to reduce their speed and use caution when approaching the closure area.
