

Cincinnati Infant Mortality Rate by Zip Code (2009 - 2013)

Infant mortality rate (IMR) is the number of babies who died in the first year of life, per 1,000 live births.

Rate

Note:

Zipcodes that fall partially within the city boundary has been labelled as "[partial]"
 *18 zip codes extending beyond the city limits; births/deaths occurring beyond city limits not included for these zip codes

Home address within the city limits at time of birth and death

This is not birth/death linked data; information obtained from the Ohio Department of Health Information Warehouse

Due to small numbers, rates may be unstable
