GREATER CINCINNATI WATER WORKS ANNOUNCES REPLACEMENT OF WATER MAIN ON CHEVIOT ROAD.

To provide better service to our customers, Greater Cincinnati Water Works (GCWW) has contracted with Trend Construction. to install replacement 24-inch and 16-inch water mains on Cheviot Road from Blue Rock Road to Tallahassee Drive.

Construction is tentatively scheduled to begin Monday December 10, 2007, and is expected to take 210 days. All traffic restrictions will be monitored and adjusted as necessary.

Construction will occur during the day and at night depending on the Phase location. The following traffic restrictions will be in place during the construction period.

Phase 1, Day Work. - Cheviot Road - From Jessup Road to Tallahassee Drive, starting on December 10, 2007.

- During the hours of 6:00 a.m. to 9:00 a.m. no work will be permitted.
- During all non-working hours the entire roadway will be open and available for traffic.
- At any time when Cheviot Road is reduced to alternating traffic with one lane, a marked police officer will be present.

Phase 2, Night Work – Cheviot Road – from Jessup Road to Blue Rock Road, starting on December 10, 2007.

- During the hours of 6:00 a.m. and 7:00 p.m. no work will be permitted except for paving operations as described below.
- During all non-working hours the entire roadway will be open and available for traffic.
- At any time when Cheviot Road is reduced to alternating traffic with one lane, a marked police officer will be present.
- Traffic will be monitored and the night work may be switched over to day work. If this occurs, expect a one week notice with electronic message boards.
- Paving Operations. Due to the weather limitations, periodic paving of Phase 2 will need to occur during the day. This work will be irregular and will be performed as expeditiously as possible. During this time traffic will be flagged when Cheviot Road is reduced to alternating traffic.

At times, unforeseen situations beyond the control of the Contractor or Greater Cincinnati Water Works may cause delays in traffic movement.

We hope our customers will pardon any inconvenience that may result from this water main improvement. Disruption to present water service will be kept to an absolute minimum.

A Greater Cincinnati Water Works inspector will be present during construction operations. Please feel free to address any concerns regarding the construction operations with our representative. Pat Arnette, Senior Engineer, at 513-591-6585, is also available to answer questions about this project.
