SUPPLEMENTAL AGENDA

9-201901824  PG 2

MOTION, dated 12/05/2019, Submitted by Vice Mayor Smitherman, WE MOVE the Cincinnati Fire Department, with assistance from the Greater Cincinnati Water Works, collaboratively work to create a plan to conduct flow tests at fire hydrants in the City of Cincinnati, and to review the system to mitigate any risk identified relating to the ability to have enough water volume and flow to fight fires in all City of Cincinnati neighborhoods.
December 5, 2019

MOTION

WE MOVE the Cincinnati Fire Department, with assistance from the Greater Cincinnati Water Works, collaboratively work to create a plan to conduct flow tests at fire hydrants in the City of Cincinnati, and to review the system to mitigate any risk identified relating to the ability to have enough water volume and flow to fight fires in all City of Cincinnati neighborhoods. It is our understanding that the Cincinnati Fire Department has the human resources to conduct this flow testing and the Greater Cincinnati Water Works has the ability to obtain the equipment to complete tests at each fire hydrant (14,000 in the City). Both departments will benefit from this collaborative approach to obtaining flow data from fire hydrants. Once the report is completed, the Cincinnati Fire Department and Greater Cincinnati Water Works will present the plan to the Law & Public Safety Committee.

WE ALSO MOVE an ordinance be created to replace the six-inch water pipe on Rose Hill Avenue in North Avondale.
