

# Two-Way Station X Plan Before Council

## Appropriation Is Asked for Survey

Feasibility of converting Station X into a two-way radio broadcasting unit for police calls will be investigated if Council approves a request of City Manager Sherrill for an appropriation of \$10,000 for a survey.

Col. Sherrill also asked Council late Wednesday to earmark \$16,000 for the rehabilitation of Station X, particularly the radio antennae and other equipment in Eden Park.

In the event more money is made available later to carry out recommendations expected to be made in the survey, the present Station X equipment would be used as a standby unit and a completely new broadcasting system installed, Col. Sherrill explained.
