Water Rate Increase – 5.55%

Greater Cincinnati Water Works (GCWW) has been in the forefront of water treatment technology for many years. Maintaining state-of-the-art treatment is crucial to providing customers with the highest quality water.

The safety of the water you drink has always been our highest priority. We constantly monitor water quality, adjust treatment processes, and implement new technologies to maintain our high

standards. Our water main repair and replacement program keeps a plentiful supply of water flowing to customers' homes, businesses and the fire hydrants that guard them.

On January 1, 2023, a 5.55% water rate increase went into effect for Greater Cincinnati Water Works customers. While no one wants to see rates go up, GCWW has been able to keep water rates among the lowest in the region (See page 2).

The Cost of Your Water

GCWW water customers are billed monthly and can estimate their water bill utilizing Tables 1 and 2. The water cost is calculated based upon the size of your meter (Water Service Charges) and the amount of water you use (Water Commodity Charges).

For example, beginning January 1, 2023, a single-family residential household located in the city with a 5/8" meter, using 8.33 CCF per month (6,230 gallons) would pay a monthly service charge of \$7.87. The water commodity or usage charge would be \$3.29 per CCF, or \$27.41 (\$3.29 times 8.33 CCF) per month. The total monthly water bill would be \$35.28, with the annual cost totaling \$423.31, or about \$1.16 a day.

Please note that the rates in these tables apply to water only, and that the 2023 rate change does not affect any other utility charges that appear separately on the customers' bill. The water service charges in Table 1 include the fire hydrant maintenance fee for customers inside Cincinnati.

We're Still Lower & Safer!

In addition to our rates being among the lowest in the region (as you can see from the chart on the right), GCWW also takes many steps to ensure the quality and safety of your water before it comes to your tap.

Our priority is safe drinking water. GCWW is proud to say that our water meets or exceeds every health standard developed by both the USEPA and Ohio EPS. On average we perform 600 tests a day, while treating and providing an average of 122 million gallons of the highest quality drinking water to more than 1.1 million people in parts of Hamilton, Butler, Warren and Clermont Counties in Ohio and Boone County in Kentucky.
